Warranty

Amkette Epic TP Rechargeable Bluetooth Mouse is backed by a 1 year performance warranty against any manufacturing defects in material or workmanship from the date of original purchase. This warranty entitles the purchaser to get the product repaired or replaced at its discretion under the following conditions:

The warranty does not cover the damage caused by misuse, abuse or improper storage.

In no event shall Amkette be responsible for any direct, incidental, consequential or other damages of any kind.

Please contact our Technical Support Line and/or send the defective product, postage pre-paid, together with the proof of purchase to our Customer Care Service Center to avail warranty service. Return charges will be paid by us.

QUICK START GUIDE

Back

Pre-Programmed DPI Levels

800 / 1200 / 1600 / 3200

Press the DPI button to toggle between the pre-programmed DPI levels.

Power Saving Modes

- The Epic TP Rechargeable Mouse intelligently reduces power consumption when idle to extend battery life across Bluetooth and 2.4Ghz modes.
- A quick click instantly wakes the mouse, allowing you to resume work without any delay.

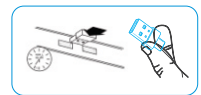

Connection and Video Guide

For the complete Product Guide, please scan this QR code.

Connecting via 2.4G

NOTE: To force pair the mouse, long press the Mode Switch Button until the Blue (BT1) or Red (BT2) LED starts blinking rapidly.

NOTE: The Nano Receiver supports both USB-A and USB-C ports. Choose the connector that fits your laptop, PC, or tablet.

Connection Guide

PAIRING

Press Blue LED

CONNECTING

Search and Connect your device

DEVICE SWITCHING

Press Red LED

Connecting via Bluetooth

- To switch between BT1 and BT2, simply press the Mode Switch Button at the back once.
- The Bluetooth indicator lights are Blue for BT1 and Red for BT2, and they show pairing, reconnecting, and successful connection status.
- When switching modes, the Blue or Red LED will turn on and blink slowly while attempting to reconnect to the last paired device.
- If no device is detected within 10 seconds, the same LED will blink rapidly to indicate pairing mode.
