Polling Rates

Press the Scroll Wheel Button + Right Button to change the polling rate directly on the mouse.

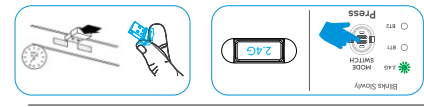

- 2.4GHz Mode:** Supports up to 8000Hz polling rate and can be adjusted via the web control center for ultra-low latency and high-performance gaming.
- Bluetooth Mode:** Operates at a fixed 133Hz polling rate, optimized for power efficiency and everyday usage.
- Wired Mode:** Supports up to 1000Hz polling rate and can be adjusted via the web control center for stable and consistent performance.

NOTE: For optimal 8000Hz performance, a high-performance system (above) higher polling rates may increase battery consumption.

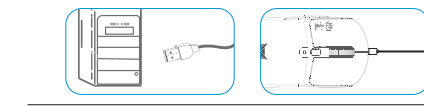

If you experience lag or stuttering, reduce the polling rate through the software.

Connection Guide

Connecting via 2.4G

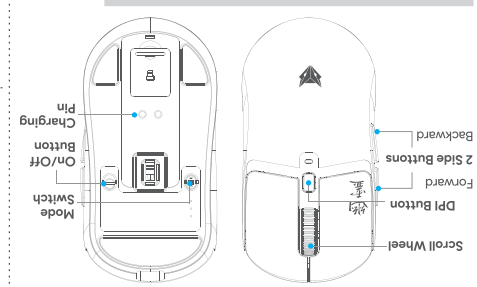

Connecting via Cable

NOTE: In 2.4GHz mode, the polling rate defaults to 4000Hz. This can be increased to 8000Hz via software for enhanced responsiveness.

NOTE: In Wired Mode, the software based on your preference, be adjusted through the software based on your preference.
