

## USING TURBO MODES

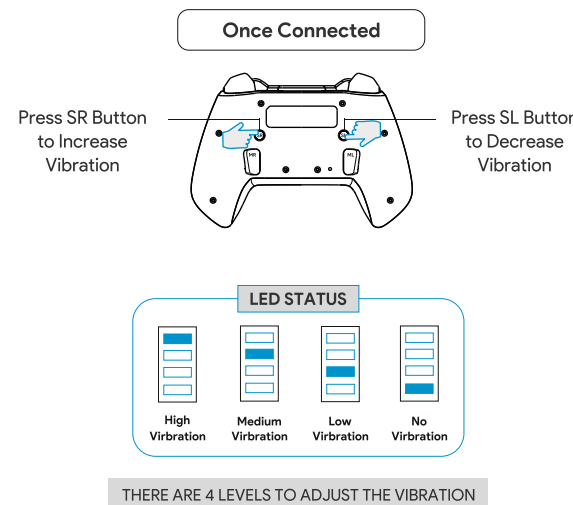

The Turbo mode on the Gamepad enables automatic and rapid repetition of a button press with a single continuous input.

- Enter the TURBO Speed Function:**  
**ENABLE:** Press Turbo+ ABXY LT/RT LB/RB to enable the turbo on a particular button.  
**DISABLE:** Repeat **above** step to disable the turbo
- Adjust TURBO Speed:**  
Press Turbo+ DPAD (UP/DOWN) to increase or decrease the turbo speed.  
**Gamepad will Vibrate**
- Clear ALL TURBO Setting:**  
Long Press the turbo button to clear the turbo.  
All the **4 LEDs** will blink with a vibration.

## HOW TO CHANGE VIBRATION LEVELS?

-9-

## HOW TO ENHANCE JOYSTICK PRECISION?

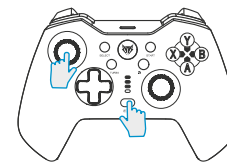

Make your Joystick movement more precise while using Key Map Mode.

### Enable Joystick Precision

Press E Z + Press LEFT JOYSTICK

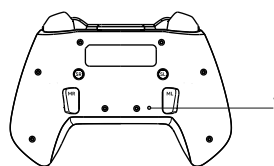

### Disable Joystick Precision

Again Press E Z + Press LEFT JOYSTICK

## RESETTING YOUR GAMEPAD

In the unlikely event the Gamepad is not responsive, use a pin to press the RESET button located at the back.

-10-

## TROUBLESHOOTING

### Why is the Gamepad not being detected by my device?

- Make sure it is charged.
- Make sure it is in the correct pairing mode.
- Make sure it is not connected to any other device.
- You may need to unpair and repair it.

### Why is the Gamepad disconnecting?

The Gamepad may need charging.

### Why is the Gamepad not working in some games on Android or iOS?

Many games are not designed to work with Native Gamepad support. Please check if the game you are playing supports the Gamepad.

### Facing any trouble with the connection?

The Gamepad may require you to Unpair or Reset.
